

Matthew 18: 21 Then Peter came to Jesus and asked, "Lord, how many times shall I forgive my brother or sister who sins against me? Up to seven times?" 22 Jesus answered, "I tell you, not seven times, but seventy-seven times. 23 "Therefore, the kingdom of heaven is like a king who wanted to settle accounts with his servants.

24 As he began the settlement, a man who owed him ten thousand bags of gold was brought to him. 25 Since he was not able to pay, the master ordered that he and his wife and his children and all that he had be sold to repay the debt. 26 "At this the servant fell on his knees before him. 'Be patient with me,' he begged, 'and I will pay back everything.'

The servant's master took pity on him, cancelled the debt and let him go. 28 "But when that servant went out, he found one of his fellow servants who owed him a hundred silver coins. He grabbed him and began to choke him. 'Pay back what you owe me!' he demanded. 29 "His fellow servant fell to his knees and begged him, 'Be patient with me, and I will pay it back.'

30 "But he refused. Instead, he went off and had the man thrown into prison until he could pay the debt. 31 When the other servants saw what had happened, they were outraged and went and told their master everything that had happened. 32 "Then the master called the servant in. 'You wicked servant,' he said, 'I cancelled all that debt of yours because you begged me to.'

33 Shouldn't you have had mercy on your fellow servant just as I had on you?' 34 In anger his master handed him over to the jailers to be tortured, until he should pay back all he owed. 35 "This is how my heavenly Father will treat each of you unless you forgive your brother or sister from your heart."

Math Equation Number One

Day's wage = one denarius
 1 Talent = 20 years pay
 10,000 talents = 200,000 years pay
 If Avg. year salary = \$50,000 year
 200,000 years X \$50,000 year =
 \$10,000,000,000
 \$10 billion debt

Math Equation Number Two

Talent = 75 pounds
 Gold = \$1500 an ounce times
 16 oz = 1 pound
 16 oz x \$1500 = \$24,000
 75pds x 10,000 tln = 750,000 pds
 750,000 x \$24,000 = \$18 billion

Math Equation Number Three

100 Denarai = aprox \$15,000
 (avg pay \$50,000)
 $\$10,000,000,000 / \$15,000 = \text{Gold} =$
 .00000015% of the debt
 In comparison of what he owed!
